

The Manifest - April 2024

Aberdeen International Airport has completed the installation of new generation 3D scanners at security checkpoints.

Departing passengers no longer need to remove electrical devices and liquids from their luggage at security and are permitted to bring bottles containing up to two litres in liquids.

However, travellers are advised to check the rules if they are travelling to/from Aberdeen through other connecting airports, as many do not yet have the new generation scanners in place.

Meet the team - Richel

Richel has been part of our team since 2019 and enjoys the challenge and variety that working within the marine travel sector brings.

Learning new destinations and creating last minute complex flight itineraries has expanded Richel's knowledge and she is a welcomed member of our team.

Seawork - Europe's largest on-water commercial marine and workboat exhibition

Southampton - 11th -13th June

We will be exhibiting at Seawork in June. Come along and meet our team at Stand P31!
